

# Feel beautiful inside and out!

with **Oxyginberry™ Beverage**

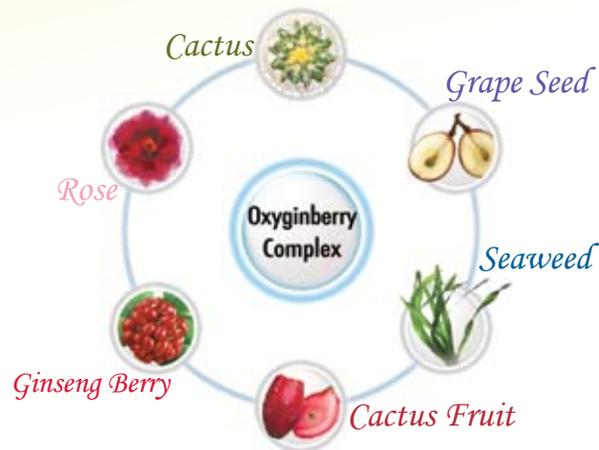

At the heart of the Elemente® USA line is one of the most unique ingredient combinations ever created—*Oxyginberry™ Complex*, combining the powerful nutrients of ginseng berry, cactus fruit, grape seed extract, cactus, seaweed and rose to bring your skin and hair the very best that nature has to offer.

But your skin and hair grow from the inside out, and what better way to ensure complete nourishment than to use these same powerful ingredients in a light, rose-flavored beverage that makes sure your skin receives the nourishment it needs at the most fundamental level.

*Oxyginberry™ Beverage* contains nothing but the six ingredients in *Oxyginberry™ Complex*, in a concentrated, powdered form that allows you to drink in these incredible ingredients with their formidable antioxidants, trace minerals and phytochemicals that help diminish the effects of aging.

When used along with the Elemente® USA line of skin and hair care products, *Oxyginberry™ Beverage* provides incredible nourishment for your body's deepest skin layers.

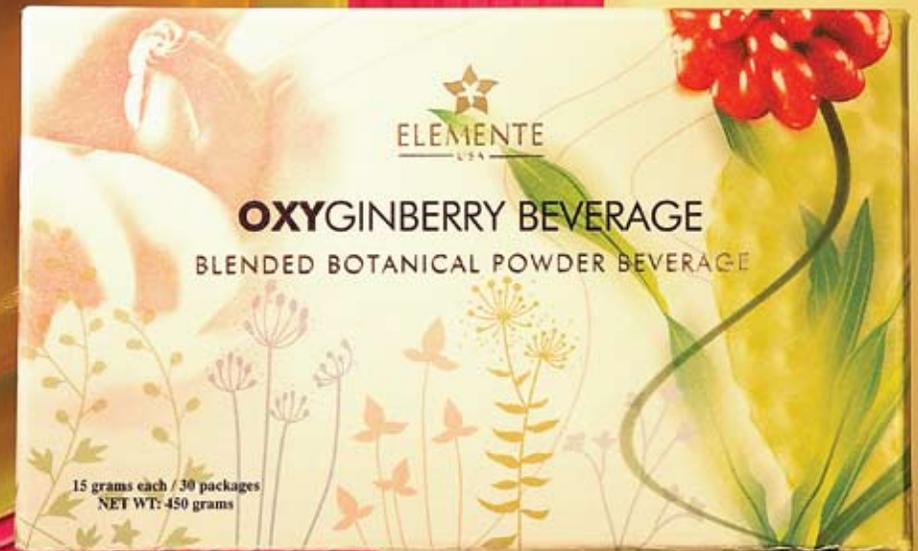

## OXYGINBERRY™ COMPLEX

 **ELEMENTE®**

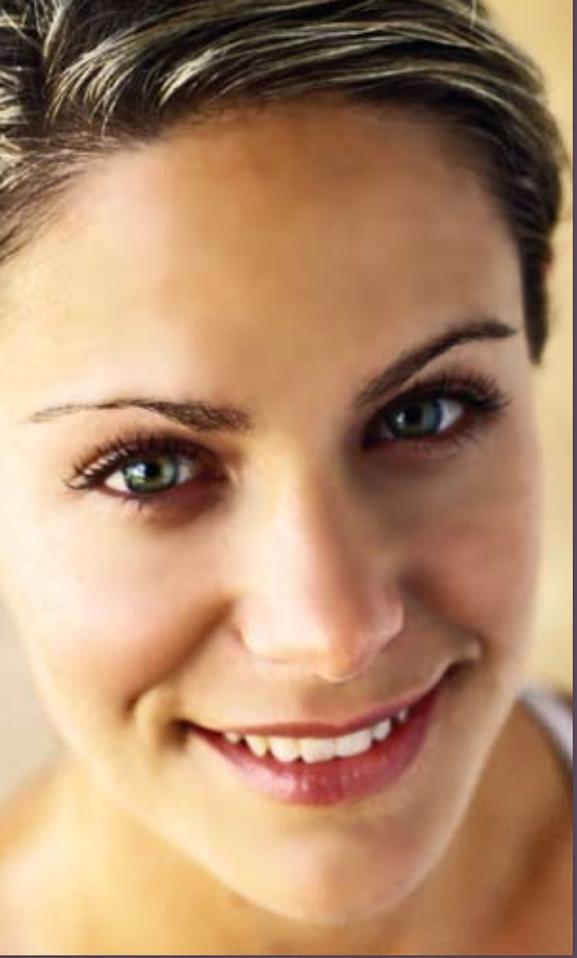

**Oxyginberry™ Beverage**

Feel beautiful inside and out!

product code: 10001

## Look and feel beautiful—inside and out—with Oxyginberry™ Beverage.

E. Excel International's breakthrough discovery, *Oxyginberry™ Complex* combines the incredible powers of the ginseng berry and cactus fruit, two precious ingredients patented by E. Excel International, with four other anti-aging botanical essences. These six ingredients are also brought together in E. Excel's Elemente® *Oxyginberry™ Beverage*.

Drinking in the powerful antioxidants, phytochemicals and trace minerals found in ginseng berry, cactus fruit, cactus, grape seed, rose and seaweed allows these nutrients to work at the deepest layers of the skin where new skin cells are constantly being created.

When combined with the deep penetrating, moisturizing and nourishing effects of E. Excel's Elemente® USA line of skin and hair care products, *Oxyginberry™ Beverage* provides the ultimate in beautiful skin—from the inside out!

### Ginseng Berry

Since the days of old, ginseng has been revered as the most valuable herb for the body. Yet, it is only recently that scientists discovered the astounding fact that the nutritional value of the ginseng berry is actually higher than the ginseng plant itself. Ginseng berry contains some of nature's best antioxidants—vitamins A, E and B<sub>2</sub>, and beta-carotene—that are important for healthy, glowing skin. As such, it plays a vital role in reducing environmental and oxidative stress, a precursor to premature aging.

### Rose

Rose, a popular ingredient in various skincare products due to its delicate fragrance, helps lift mood and spirit. In addition, rose is a gentle astringent that has cleansing, purifying and softening properties. At the same time, rose enhances beauty by helping to lighten skin for a smoother, fairer complexion.

With age, comes the loss of collagen and skin elasticity. When that happens, fine lines and wrinkles appear. With ingredients like rose, that may encourage collagen production, your skin remains healthy and beautiful. Furthermore, rose, with its exceptionally high concentration of vitamin C, also helps fight free radicals.

### Cactus

The essence of cactus lies in its large, thick, waxy stems that store food and water crucial to its growth. Research found that these nutrients and minerals have remarkable effects on the skin, and the older the cactus is, the more valuable its nutrients become. However, because cactus can take decades to become fully grown and then must be processed with care, the nutrients that cactus contains are extremely precious.

With regard to hydrating abilities, few plants can match the cactus. Like an oasis, the cactus keeps precious moisture and nutrients locked inside. Scientists believe that cactus contains essential nutrients that provide excellent nourishment to both the body and skin.

### Cactus Fruit

Cactus fruit contains a plethora of nutrients extremely beneficial to health, but getting the cactus fruit to yield up its nutritional treasures calls for patience and skill. It takes up to four years for the priceless fruit to develop and ripen, and extreme care must be taken in harvesting and processing or it will rapidly lose its exceptional nutritional value. The cactus fruit boasts seven times more antioxidants than vitamin C and is an excellent source of riboflavin and vitamins A, B<sub>1</sub>, D<sub>3</sub> and B<sub>12</sub>. Most importantly, however, research indicates that cactus fruit plays a significant role in promoting cell repair and renewal.

### Grape Seed

Wholesome plant foods are rich in antioxidants that protect the human body from oxidative cell damage. One very strong antioxidant found in red grape seeds is oligomeric proanthocyanidin (OPC). Studies show that red grape seed extract possesses 20 times more antioxidant activity than vitamin C and 50 times more antioxidant activity than vitamin E! Furthermore, grape seed extract is rich in vitamins A, B<sub>2</sub> and C. It effectively protects cells from oxidative damage. Research proves the powerful antioxidant effects of grape seed, and indicates that grape seed may reduce signs of aging for a young-looking, radiant appearance.

### Seaweed

Concentrating all of the ocean's nutrients in perfect balance, seaweed provides one of the richest sources of minerals, trace elements, amino acids, antioxidants, polysaccharides and enzymes found anywhere in nature. Seaweed also contains B-complex vitamins and vitamins D, E and K. Charged minerals and trace elements ionize and help rejuvenate cells and connective tissue, and stimulate collagen synthesis and cellular turnover. It is perfect for the body and skin.

OXYGINBERRY™ COMPLEX
