

# ACT™

## Supports the Immune System

### Benefits

- Stimulates the Immune System
- Supports Clear Breathing
- Comforts the Digestive System
- Enhances Circulation
- Improves Energy

A challenged immune system cannot support other body systems, which may become weakened, affecting circulation, digestion and your overall sense of well-being. *ACT™* combines three herbs traditionally used to support the immune system and scientifically supported to benefit your health.

### How *ACT™* Works

*ACT™* helps the immune system clear the body of toxins and harmful invaders and restore proper functions of the digestive and circulatory systems. Better digestion provides more available nutrients for immune defenses. Improved circulation of the blood and lymph help the immune system get rid of its waste products. Less waste products clogging the system leaves room for more oxygen and nutrients for our cells, which translates to more energy for you!

### Nutritional Immunology Formulation

Most immune system formulas focus on specific symptoms, with temporary results. Formulated according to the science of Nutritional Immunology, *ACT™* provides balanced support for the immune system, achieving lasting results on overall health.

## E. Excel Nutritional Immunology® Whole Food Concentrates

E. Excel Nutritional Immunology®, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life's most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

### Herbal Whole Food Concentrates

E. Excel's whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of "accidental overdose" because their ingredients are whole foods.

### Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. Excel whole food concentrate supports functions of specific body systems by balancing the immune system's activity or "energy" in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. Excel Nutritional Immunology® whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
