Defend Your Skin with
CACTUS POWER

Survival of the Fittest

Cactus grows in deserts. Growing in such a harsh environment requires a strong life force. Its thick stem stores precious water and nutrients. Cactus has evolved over thousands of years in its struggle to capture life-giving water and survive in the desert. Its prickly exterior protects an amazing store of nutrients waiting to be discovered.

The older the cactus, the more nutrients it has. It takes many decades to grow.

Astonishing Skin Benefits

Cactus contains many different nutrients that help to hydrate skin and delay visible signs of aging:

- ▶ Our skin is under constant attack from pollution and environmental aggressors and burdened by makeup and sun exposure. This causes skin to become inflamed easily.
Cactus contains beta-sitosterol, an anti-inflammatory phytochemical that helps maintain healthy skin.
- ▶ Sun exposure and pollution speed up skin's aging process.
Cactus is rich in antioxidants that may help slow down visible signs of aging.
- ▶ Wind, sun exposure, air-conditioning and aging—all these stress the skin and cause moisture loss, resulting in dry skin and other skin problems.
Research shows that cactus extract can effectively maintain moisture. Its antioxidants enhance the skin's ability to lock in moisture. Long-term use can help to smooth fine lines and wrinkles.

Cactus Essence Aqua Gel Facial Moisturizer

Highly concentrated antioxidants in natural cactus extract work in perfect synergy with *Oxygenberry Complex* to deliver exceptional all-day hydration and nourishment. When applied, *Cactus Essence Aqua Gel Facial Moisturizer* quickly releases hydrating particles. They form a protective film barrier on skin that locks in moisture with its unique netted structure and slowly releases stored moisture and nutrients into skin for long-lasting hydration. Skin feels bouncy, hydrated and velvety smooth. *Cactus Essence Aqua Gel's* refreshing texture and outstanding hydrating ability make it an excellent choice for daytime skin care.

Directions: Apply *Oxygenberry Essence Hydrating Facial Serum* before applying *Cactus Essence Aqua Gel* to cleansed face and neck for the best hydrating effect.

Cactus Essence Hydrating Facial Lotion

Wake up to healthier, smoother and more youthful-looking skin! Natural cactus extract works in perfect synergy with *Oxygenberry Complex* overnight to nourish skin, and significantly improve the appearance of rough, dull skin. Unique cactus extract forms a moisturizing protective film on skin to deliver effective long-lasting hydration and increase skin's defense against environmental stress. This soothing lotion spreads easily over skin, leaving a comfortable, smooth sensation. *Cactus Essence Hydrating Facial Lotion* is your ideal night-time skin care companion.

Directions: Apply *Oxygenberry Essence Hydrating Facial Serum* before applying *Cactus Essence Hydrating Facial Lotion* to cleansed face and neck. Let cactus extract and *Oxygenberry Complex* work overnight to nourish your skin.

Cactus Essence Pore Refiner Facial Cream

Airbrush away imperfections with *Cactus Essence Pore Refiner Facial Cream*! Its light-diffusing particles instantly soften and blur the look of pores, pigmentation and fine lines so skin looks flawless. A unique and flexible netted structure of 3D polymers adheres closely to skin to provide excellent coverage. Natural cactus extract and *Oxygenberry Complex* nourish and provide long-lasting hydration to skin. *Cactus Essence Pore Refiner* is gentle enough for use around the delicate eye area. It will not clog pores or cause acne or dry lines. *Cactus Essence Pore Refiner* is suitable for both men and women, and ideal for daytime use.

Directions: Apply *Oxygenberry Essence Hydrating Facial Serum* to cleansed face and neck. Follow with your moisturizer. Next, gently smooth *Cactus Essence Pore Refiner* onto face and neck.

Precious Cactus Essence

Extracting cactus essence is a difficult process.

- ▶ Cactus gel oxidizes very easily. After removing the spines and skin, cactus gel has to be filtered quickly within one or two hours.
- ▶ Cactus gel goes through many filtering processes before pure cactus extract can be obtained:

- **Particle Filtration**

Impurities and other macro and micro particles in cactus gel are removed by centrifuge.

- **Microfiltration**

Cactus liquid undergoes low-pressure particle separation to remove smaller micro particles, dust and other macro molecular substances.

- **Ultrafiltration**

Removes smaller micro molecular particles like bacteria.

After cactus gel undergoes many filtering processes, only a tiny amount of cactus extract remains. Hence, it is very precious!
