

## CIRCLE®

### Helps Maintain Healthy Circulation

#### Benefits

- Helps Maintain Healthy Blood Viscosity
- Cleanses the Blood
- Strengthens the Heart and Coronary Blood Flow
- Supports Healthy Blood Pressure Levels

The circulatory system delivers vital oxygen our cells need to survive. The heart pumps blood through a network of arteries, veins and capillaries. If it fails, it deprives our cells of oxygen, and our immune system suffers since lymph nodes cannot dispel waste products. While diet and exercise are important factors in maintaining a healthy heart and circulatory system, genetics may override our good efforts, causing heart problems, poor circulation, high blood pressure and cholesterol, leading to damaged tissues deprived of oxygen. *Circle*® is a balanced combination of traditional herbs used to help maintain healthy circulation.

#### How *Circle*® Works

*Circle*® combines both heating and cooling aromatic herbs to help achieve proper balance between overactive and underactive functions that affect the circulatory system. It addresses blood viscosity and lipid composition, liver metabolism and blood pressure, which are important in maintaining healthy circulation. *Circle*® helps improve circulatory health in those with poor circulation, and provides antioxidants and fatty acids to maintain long-term improved circulation. Whether you have a family history of cardiovascular challenges, have led a sedentary lifestyle or have always had a healthy heart, *Circle*® is a safe and effective way to help ensure circulatory system health at any age.

#### Nutritional Immunology Formulation

Those who face circulatory problems have many options today for improving their conditions. However, researchers have found that everyone responds differently to these options and some may try several different approaches before finding one that is safe and effective.

Based on the principles of Nutritional Immunology, *Circle*® supports the entire circulatory system for long-term maintenance of healthy circulation.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

## E. Excel Nutritional Immunology® Whole Food Concentrates

E. Excel Nutritional Immunology®, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life's most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

### Herbal Whole Food Concentrates

E. Excel's whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of "accidental overdose" because their ingredients are whole foods.

### Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. Excel whole food concentrate supports functions of specific body systems by balancing the immune system's activity or "energy" in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. Excel Nutritional Immunology® whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
