

CONCENERGY®

Boosts Energy and Stamina

Benefits

- Non-Stimulant Energy Booster
- Balances Kidney and Adrenal Function
- Enhances Immunity
- Helps the Body Build Stamina Against Stress
- Restores Fluid Balance

Lack of energy and/or stamina causes many adults to visit a health professional. Fatigue affects many individuals both mentally and physically. It can lead to decreased productivity, poor sleep quality and mood swings. *Concenergy*® combines “super foods” and herbs traditionally used to boost energy and stamina, with scientifically validated results.

How *Concenergy*® Works

In Traditional Chinese Medicine, the kidneys and adjacent adrenal glands are the center of the body’s energy. When the kidneys are not supported and our adrenals are over-stimulated by stress or stimulants, we become deficient in vital energy. By correcting fluid balance through the kidneys and supplying essential nutrients to our adrenal glands, *Concenergy*® restores the energy we need to function daily.

Traditionally, adaptogens such as Panax ginseng and licorice help the body balance its processes. Whether overactive or underactive, adaptogens help adjust these processes to normal activity levels. Other ingredients in *Concenergy*® cleanse and soothe the liver, which is also involved in energy production. For most of us, increased energy and enhanced stamina can mean a better quality of life.

Nutritional Immunology Formulation

When most people hear “energy,” they think of stimulants, such as ephedrine, caffeine or pharmaceutical ingredients, which provide quick and intense energy, but leave us depleted at the end of the day. In some cases, we become dependent on these substances just to function daily. In contrast, *Concenergy*® works with the body, not against it, to ensure that you have sustained energy throughout the day, balanced with improved sleep at night and increased stamina over time.

E. Excel Nutritional Immunology® Whole Food Concentrates

E. Excel Nutritional Immunology®, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life’s most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

Herbal Whole Food Concentrates

E. Excel’s whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of “accidental overdose” because their ingredients are whole foods.

Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. Excel whole food concentrate supports functions of specific body systems by balancing the immune system’s activity or “energy” in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. Excel Nutritional Immunology® whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
