

**D•I**<sup>®</sup>

## Balances the Digestive Process

### Benefits

- Aids Proper Digestion
- Comforts the Gastrointestinal Tract
- Supports Immunity
- Enhances Vital Energy

To supply our body with optimal nutrition, our digestive system requires a proper balance of digestive enzymes, acids, bile salts and intestinal flora. When this balance is disrupted, we may experience acute discomfort or even long term effects like malnutrition or damage to the gastrointestinal organs from excess acid. Besides poor dietary habits, age and emotional stress can cause such imbalances. *D•I*<sup>®</sup> balances the digestive process to help nourish the body and comfort the stomach and intestinal tract.

### How *D•I*<sup>®</sup> Works

*D•I*<sup>®</sup> combines aromatic herbs with adaptogens to help correct the body's chemistry and energy levels. Aromatic herbs stimulate gastric secretions such as enzymes, acids and bile. Adaptogens help the body to normalize itself when it becomes overactive or underactive, making *D•I*<sup>®</sup> beneficial for those with either too much or not enough acid and enzymes. *D•I*<sup>®</sup> also includes papaya, a natural source of protein-digesting enzymes. As we age, our ability to digest proteins declines, affecting our energy levels, muscle tone and immunity. By supporting proper protein metabolism, we help maintain our youth and vitality.

### Nutritional Immunology Formulation

Digestion is fueled by the energy from enzymes produced by both our body and our foods. Each of these enzymes requires a specific pH to work, which means we need adequate levels of acid in the stomach and bile in the intestines. Unfortunately, most people rely on acid reducers to provide temporary relief when they experience indigestion. *D•I*<sup>®</sup> is formulated to correct imbalances in the digestive process rather than simply shut down acid production in the stomach.

## E. Excel Nutritional Immunology<sup>®</sup> Whole Food Concentrates

E. Excel Nutritional Immunology<sup>®</sup>, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life's most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

### Herbal Whole Food Concentrates

E. Excel's whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of "accidental overdose" because their ingredients are whole foods.

### Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. Excel whole food concentrate supports functions of specific body systems by balancing the immune system's activity or "energy" in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. Excel Nutritional Immunology<sup>®</sup> whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
