

GINBERRY®

Supports Healthy Blood Glucose Levels and Weight Management

Benefits

- Supports Healthy Blood Glucose Levels
- Maintains Normal Cholesterol Levels
- Helps Protect the Nervous System
- Curbs Appetite
- Contributes to a Youthful Appearance
- Enhances Energy

Maintaining proper blood sugar balance and healthy body weight is becoming more and more of a health challenge. Many factors, such as stress, diet and lack of exercise, affect our cells' ability to use insulin properly. Without effective uptake of insulin, our cells cannot use glucose for energy and instead the body stores it as fat. Because fat cells may further alter the body's reaction to insulin, this vicious cycle can affect us physically, mentally and emotionally. *Ginberry*® is an herbal combination formulated to help break this destructive cycle.

How *Ginberry*® Works

Ginberry® uses multiple herbs shown to balance blood sugar and cholesterol levels. Other herbs in the formula help reduce damage to our cells caused by stress. Lycium fruit, in particular, has polysaccharides that increase our body's levels of superoxide dismutase (SOD), an antioxidant enzyme needed by every cell in the body to protect against DNA damage. In addition, *Ginberry*® helps maintain healthy weight by curbing appetite and increasing energy.

Nutritional Immunology Formulation

Recent research into the connections between inflammatory reactions of the immune system, insulin resistance and longevity has suggested that balance is the key to maintaining long-term good health. *Ginberry*® combines six herbs with multiple actions that not only help improve blood sugar and cholesterol metabolism, but also help protect against some of the harmful effects of uncontrolled blood sugar imbalances.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

Caution: Pregnant or lactating women should consult their physician before using *Ginberry*.

E. Excel Nutritional Immunology® Whole Food Concentrates

E. Excel Nutritional Immunology®, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life's most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

Herbal Whole Food Concentrates

E. Excel's whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of "accidental overdose" because their ingredients are whole foods.

Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. Excel whole food concentrate supports functions of specific body systems by balancing the immune system's activity or "energy" in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. Excel Nutritional Immunology® whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
