

HandyGel®

Family Care

Bacteria and viruses enter the body via different routes. Washing your hands frequently helps prevent these dangerous micro-organisms from entering the body. However, how well you wash your hands is important. Your seemingly clean hands may actually be teeming with germs picked up from contaminated surfaces.

Studies show that up to 80% of the germs that cause illness are spread by hands and the things we touch—not through the air. In fact, germier hands are the primary way people get sick, meaning that the majority of common illnesses can be prevented simply by washing our hands. However, it is not always convenient to get to a sink and scrub your hands, and often soap and water are not available. But today, there is a solution—*HandyGel*® hand cleanser kills 99.9% of germs in 15 seconds without the use of soap and water. Simply wet hands thoroughly with *HandyGel*® and allow to dry. Gentler on your skin than soap and water, *HandyGel*® is specially formulated with moisturizers, leaving hands feeling soft and refreshed. And there is no harmful residue.

Consider all the things you touch each day that dozens—sometimes hundreds—of people touched before you: money, door knobs, shopping carts, escalator handrails, copiers, mail and express packages, elevator buttons, etc. Did they wash their hands? Protect yourself and your loved ones against these infectious germs and carry *HandyGel*® wherever you go!

HandyGel contains cactus extract and many other natural plant extracts. Apply a little HandyGel onto hands without using water and rub hands together gently. This forms a protective layer that cleans and moisturizes your hands. HandyGel is a convenient and fast way to clean your hands when water and soap are unavailable or if you need to ensure your hands are extra clean.

E. Excel Nutritional Immunology®

Prevention Over Cure

Family Care Products

Our mission at E. Excel International is to share the gift of health and the knowledge of E. Excel Nutritional Immunology® with the world. This is not merely a statement, but a promise of our commitment. And, because E. Excel has the knowledge, leadership and products to promote healthy living, we have an opportunity to make a difference.

In today's world health community, E. Excel International serves as the leader in the field of Nutritional Immunology, a science that focuses on the delicate balance between nutrition and our ability to maintain optimal health.

E. Excel's family care products were designed with the health and hygiene needs of the modern family in mind. They provide the means for us to help protect ourselves from the many germs, bacteria and environmental hazards found in the world today.

Many kinds of microorganisms can be found on our own skin and the surfaces of the foods we eat. Many of these organisms, such as *Staphylococcus Aureus* and *E. coli*, are known to cause illness. It is in our best interests to make sure that as few of these microorganisms make it past our lines of defense as possible.

E. Excel's Family Care products adds an additional line of defense, protecting us from microorganisms *before* they can enter our body!
