

## Ji-LIN GINSENG

Enhances Natural Vitality and Strength

### Benefits

- Helps the Body's Resistance to Stress
- Supports Libido and Proper Male Function
- May Improve Cognitive Functions in Middle-Aged Adults
- Normalizes Blood Pressure and Blood Sugar
- Stimulates Immune Reactions

Much like automobile engines, our bodies work much better when everything is in tune and working in harmony. Think about what a difference a tune-up can make in your gas mileage or a radiator service can do to protect your car in the summer! Adaptogenic herbs help your body “tune” itself up so all its systems work more efficiently and conserve energy. In addition, they help adapt a better resistance to stress and its harmful effects on the body. E. Excel's *Ji-Lin Ginseng* uses premium quality Panax ginseng root, which is prized for its ability to enhance natural vitality and strength.

### How *Ji-Lin Ginseng* Works

Pharmacological research in China has confirmed several actions of Panax ginseng. In addition to the ability to normalize (i.e., either raise or lower) blood sugar and blood pressure, it also has vasodilatory, cardiotoxic, sedative and neuroendocrine actions. Its most noted action is on the adrenal cortex/hypothalamic axis, regulating stress hormones.

### Nutritional Immunology Formulation

There are many different varieties of “ginseng,” some of them not even true ginseng species. However, Panax ginseng from the Ji-Lin province of China is known to be the best quality and most expensive. It has unique benefits like no other ginseng, even from the same species. This particular variety is also known as “Wild Mountain Root.” Today, E. Excel makes it affordable enough for anyone to reap the benefits of this valuable herb.

## E. Excel Nutritional Immunology® Whole Food Concentrates

E. Excel Nutritional Immunology®, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life's most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

### Herbal Whole Food Concentrates

E. Excel's whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of “accidental overdose” because their ingredients are whole foods.

### Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. Excel whole food concentrate supports functions of specific body systems by balancing the immune system's activity or “energy” in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. Excel Nutritional Immunology® whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
