

NOCO®

Strengthens Respiratory Function

Benefits

Provides Relief to the Throat and Respiratory Tract

Regulates Body Temperature

Enhances Seasonal Immune Defenses

Soothes Muscle and Joint Discomfort

Our respiratory system, including our lungs, trachea, nose and sinuses, is composed of the only internal organs in our body that are in direct contact with the external environment. Our immune system works extra hard to protect the body against invaders that may enter through this exposed system. When our respiratory system is under attack, congestion, temperature fluctuations and irritation can make us feel at our worst. Feel better by using *NOCO*®, with six herbs combined according to ancient wisdom to soothe and strengthen respiratory function.

How *NOCO*® Works

NOCO® combines several diaphoretic herbs to induce sweating, helping the immune system to regulate the body's temperature. Each herb has its own soothing properties to calm respiratory spasms and provide relief to irritated tissues such as the throat and nose. The aromatic herbs in this formulation contain volatile oils with properties that defend against potential offenders.

Nutritional Immunology Formulation

NOCO® is a pleasant-tasting, carefully balanced Nutritional Immunology combination of both warming and cooling herbs, all with soothing properties specific to the respiratory system. Each herb is prepared using traditional practices, combined with state-of-the-art technology to ensure premium quality and maintain optimal content of immune enhancing phytochemicals, polysaccharides and antioxidants.

E. Excel Nutritional Immunology® Whole Food Concentrates

E. Excel Nutritional Immunology®, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life's most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

Herbal Whole Food Concentrates

E. Excel's whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of "accidental overdose" because their ingredients are whole foods.

Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. Excel whole food concentrate supports functions of specific body systems by balancing the immune system's activity or "energy" in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. Excel Nutritional Immunology® whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
