

NOCO®

Supports and Strengthens Respiratory Function

Benefits

- Modulates Immune Effects
- Assists Healthy Pulmonary Functions
- Boosts Seasonal Immune Defenses
- Helps Restore Depressed Immune Response

Our respiratory system, including our lungs, trachea, nose and sinuses, is composed of the only internal organs in our body that are in direct contact with the external environment. That means our immune system has to work extra hard to protect the body against invaders that may enter through this system. When our respiratory system is under attack, congestion, temperature fluctuations and irritation can make us feel at our worst. *NOCO*®, a combination of herbs using ancient wisdom and modern research, helps soothe and strengthen your respiratory function.

How it Works

NOCO combines several strong immune-supportive herbs that help the lungs actively fight infection while also helping to control inflammation and temperature fluctuations. Antioxidants in the ingredients also fight free radicals that can become less manageable by the onslaught of viral and bacterial aggression. By strengthening the lungs and modulating the immune system, the body is more able to defend itself from invaders from the outside environment.

Nutritional Immunology Formulation

NOCO® is a wholesome, carefully balanced Nutritional Immunology combination of herbs that benefit the respiratory system. Each herb is prepared using traditional practices, combined with state-of-the-art technology to ensure premium quality. That means maintaining optimal content of immune enhancing phytochemicals, polysaccharides and antioxidants

E. EXCEL Nutritional Immunology® Whole Food Concentrates

E. EXCEL Nutritional Immunology®, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life's most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

Herbal Whole Food Concentrates

E. EXCEL's whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of “accidental overdose” because their ingredients are whole foods.

Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. EXCEL whole food concentrate supports functions of specific body systems by balancing the immune system's activity or “energy” in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. EXCEL Nutritional Immunology® whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
