

Oxyginberry™ Beverage

Health Beverage

Six ingredients—ginseng berry, cactus fruit, cactus, grape seed, rose and seaweed—combine in E. EXCEL's *Oxyginberry™ Beverage*, creating a beverage packed with healthy antioxidants, phytochemicals and trace minerals that are easily absorbed.

- Ginseng berry contains some of nature's best antioxidants—vitamins A, E and B₂, and beta-carotene.
- Cactus fruit boasts seven times more antioxidants than vitamin C and is an excellent source of riboflavin and vitamins A, B₁, D₃ and B₁₂.
- Cactus is one of the richest foods available containing thousands of phytochemicals. Research shows that cactus contains essential nutrients that provide excellent nourishment to both the body and skin.
- Studies also indicate that red grape seed extract possesses 20 times more antioxidant activity than vitamin C and 50 times more than vitamin E, and it is rich in vitamins A, B₂ and C.
- Rose encourages collagen production and contains high concentrations of vitamin C, which helps fight free radicals.
- Seaweed provides one of the richest sources of minerals, trace elements, amino acids, antioxidants and enzymes found anywhere in nature!

Drinking in these powerful ingredients puts these nutrients to work inside the body, not only beautifying skin, hair and nails, but supporting longevity and the health of vital internal organs as well.

A box of *Oxyginberry™ Beverage* contains 30 individually packaged servings.

E. EXCEL Nutritional Immunology®

Prevention Over Cure

Nutritional Immunology is a relatively new science pioneered by E. EXCEL's founder, Dr Jau-Fei Chen. It studies the close relationship between nutrition and the immune system. Dr Jau-Fei Chen's research shows that consuming healthy foods strengthens the immune system; a strong immune system can defend us from most illnesses. Nutritional Immunology emphasizes consuming natural, wholesome foods for good health and does not endorse consuming chemically processed foods. This science surpasses the study of basic nutrients essential for survival such as vitamins and proteins. Instead, Nutritional Immunology researches how antioxidants, phytochemicals and polysaccharides help boost the immune system.

Nutritional Immunology emphasizes prevention over cure. Health problems can be better prevented if we provide our immune system with proper nourishment daily.

Our Manufacturing Processes

E. EXCEL's formulates its products on the science of Nutritional Immunology. We have spent much time and effort on our manufacturing processes, which include:

- Researching the different types of plant food that contain the most abundant phytochemicals, antioxidants and polysaccharides;
- Studying which plant species is most beneficial to the human immune system. For example, there are over 80 species of ginger but all contain varying amounts of nutrients;
- Analyzing which parts of a plant are most nutritious;
- Selecting the most appropriate harvest time. For example, the older the ginseng, the better it is, as ginseng harvested at a young age yields little nutritional benefit. Mushrooms should be harvested when they are still young to obtain optimum quality;
- Using appropriate processing techniques, i.e., some plants must be heated before use while others should not be heated.

E. EXCEL's products are effective because of the amount of research and professional expertise devoted to each product formulation. Every single product is highly concentrated and packed using state-of-the-art technology to ensure that nutrients will not be lost.

E. EXCEL's products are not medications. They are botanical food products based on the science of Nutritional Immunology to supplement your nutrient sources and help provide balance to your daily diet.

E. EXCEL's products are not intended to diagnose, treat, cure or prevent any diseases and should not be used as a substitute for professional medical diagnosis and treatment. If you experience any discomfort, please consult your doctor for advice.
