

# The Essence of Simplicity®

## Plant Essences

A fast-paced lifestyle and unhealthy diet can cause digestive tract problems. The Essence of Simplicity is specially formulated to help maintain a healthy digestive system. Its phytochemical-rich contents provide the digestive tract with the help it needs to recover and stay cleansed and healthy. Digestive functions are improved and skin becomes smooth, glowing and beautiful. The Essence of Simplicity is natural, non-addictive and helps simplify your lifestyle.

The Essence of Simplicity contains pearl extract that has been professionally processed so that it is soluble and easily absorbed by the body. From an academic point of view, pearls are not plants. However, because plants and pearls share several characteristics, they are often treated as herbal plants. They are rich in nutrients, including vitamin B complex, polysaccharides as well as proteins, calcium and some 20 types of amino acids, which can promote tissue regeneration. Pearls are often viewed as priceless jewelry, but their nutritional content has often been undervalued.

In addition, winter melon and sterculia seeds balance the functions of our digestive system, while honeysuckle flower suppresses harmful microorganisms and rids the body of harmful toxins.

The Essence of Simplicity comes in a carton of six 140 ml Cheer Packs.

## E. Excel Nutritional Immunology®

### Prevention Over Cure

### Plant Essences

E. Excel's *Plant Essence* beverages reveal the essence of nature in its purest form, combining some of the earth's greatest gifts with cutting edge technology to bring you a revolutionary line of products.

#### *The Ingredients*

We combined some of Mother Nature's most unique treasures, harvested at the pivotal time for optimal nutritional content, to create the *Plant Essence* line. With fortifying phytochemicals and other essential nutrients, they help give your body the nutrition it needs to maintain optimal health, boost energy and fight off free radicals. The *Plant Essence* line is made with all natural ingredients and contains no preservatives, caffeine or other stimulants and will produce no harmful side effects.

#### *The Packaging*

To package these unique products, we again use only the best materials—an advanced fluid container called Cheer Pack. Patented in Japan, the Cheer Pack film, a laminate consisting of four layers of plastic and aluminum foil, ensures the safety and stability of the content. This innovative container is airtight and microbial free, so the contents need no preservatives. It also blocks sunlight, is easily stored, environmentally smart and completely non-toxic. E. Excel has invested in state-of-the-art machinery and isolated packaging facilities to provide the best product quality available.

#### *The Convenience*

You can drink the *Plant Essence* products right out of the package—no measuring spoon or glass is needed. These beverages are also lightweight, leak-proof and the twistable cap makes them easy to re-close, so you can drink half and save the rest for later. The *Plant Essence* beverages are ideal for someone on the go who isn't willing to sacrifice much-needed nutrients.

E. Excel brings you a line of nutritious, delicious, ready-to-drink beverages in a high-tech package. *Plant Essence*—Nutrition made simple.
