

## TRIFLORA™ OSMANTHUS

*Nourish the health of your senses!*

Our body is exposed to heavy metals, preservatives, air pollution and toxic chemicals daily. The accumulation of these harmful substances in our cells will harm our body and have an adverse effect on our health.

*Triflora™ Osmanthus* is a caffeine-free beverage that contains five-leaf ginseng and other healthful, natural herbs. Daily consumption of *Triflora™ Osmanthus* helps cleanse the body systems and keep the body full of vitality.

*Triflora's* main ingredient is the precious five-leaf ginseng, also known as sweet tea vine, which is rich in botanical nutrients like ginsenosides, flavones, vitamins and trace elements. Research has shown that five-leaf ginseng is rich in phytochemicals and antioxidants. It boosts metabolism, detoxifies the body and helps the immune system function smoothly. Green tea leaves contain phytochemicals called polyphenols, whose strong antioxidant activities help maintain a healthy body.

*Triflora™ Osmanthus* also contains chrysanthemum and *Osmanthus fragrans*. Chrysanthemum possesses high levels of phytochemicals with powerful anti-inflammatory and antioxidant effects. Osmanthus relieves stress with its relaxing and uplifting fragrance. Its aroma helps reduce appetite, thereby aiding weight control.

The uniqueness of *Triflora™ Osmanthus* lies in the harvesting and processing of the five-leaf ginseng. It is harvested only once a year and only the young leaves at the top of the plant are used. Harvesting must be performed carefully by hand. The leaves of five-leaf ginseng have a unique aroma and tea made with these leaves is clear.

E. Excel selects the green tea for *Triflora™ Osmanthus* carefully. Then, these green tea leaves are decaffeinated by roasting them slightly at low temperatures, followed by treatment with carbon dioxide and water to ensure that the green tea leaves used contain only traces of caffeine.

*Triflora™ Osmanthus* is packaged in a box of 30 mesh teabags, each individually wrapped in foil packets to protect freshness and contents. Steep each teabag in 100 ml of warm water. Inhale and enjoy its aroma before drinking!

## E. Excel Nutritional Immunology®

### Prevention Over Cure

Nutritional Immunology is a science pioneered by E. Excel's founder, Dr Jau-Fei Chen. It studies the close relationship between nutrition and the immune system. Research shows that consuming healthy foods strengthens the immune system; a strong immune system can defend us from most illnesses. Nutritional Immunology emphasizes consuming natural, wholesome foods for good. This science surpasses the study of basic nutrients essential for survival such as vitamins and proteins. Instead, E. Excel Nutritional Immunology® researches how antioxidants, phytochemicals and polysaccharides help boost the immune system.

E. Excel Nutritional Immunology® emphasizes prevention over cure. Many health problems can be better prevented if we provide our immune system with proper nourishment on a daily basis.

### Our Product Development Process

We formulate our products utilizing the science of Nutritional Immunology as our foundation. Our development process includes developing and manufacturing wholesome products, which includes:

1. Researching the different types of plant food that contain the most abundant phytochemicals, antioxidants and polysaccharides;
2. Studying which plant species is most beneficial to the human immune system. For example, there are over 80 species of ginger, but all contain varying amounts of nutrients;
3. Analyzing which parts of a plant contain the most beneficial phytonutrients;
4. Selecting the most appropriate harvest time. For example, the older the ginseng, the better it is, as ginseng harvested at a young age yields little nutritional benefit. Mushrooms should be harvested when they are still young to obtain optimum quality;
5. Using appropriate processing techniques, i.e., some plants must be heated before use while others should not be heated.

E. Excel is effective because of the amount of research and expertise devoted to all stages of product development, from beginning to end. Every single product is highly concentrated and packed using state-of-the-art technology to ensure that valuable phytonutrients will not be lost. E. Excel takes great care in providing you the best products available.

E. Excel's products are not medications. They are botanical food products based on the science of Nutritional Immunology to supplement your nutrient sources and help provide balance to your daily diet.

E. Excel's products are not intended to diagnose, treat, cure or prevent any diseases and should not be used as a substitute for professional medical diagnosis and treatment. If you experience any discomfort, please consult your doctor for advice.
