

# VISION™

## Antioxidant Nourishment for the Eyes and Body

### Benefits

- Helps Protect the Cardiovascular and Nervous Systems from Free Radical Damage
- May Help Improve Function of the Eyes
- Enhances Liver Function
- Helps Cleanse Damaging Toxins from the Liver

As we age, many factors affect our vision, including unstable free radicals. Seeking to stabilize themselves, free radicals steal electrons from our cells, damaging them. Antioxidants can donate electrons to free radicals, protecting our cells. *Vision™* provides antioxidant nourishment for the eyes and body.

### How *Vision™* Works

Antioxidants have certain affinities for specific tissues, and they require specific vitamins, minerals and other compounds as their counterparts. For example, vitamin C makes the polyphenols in grape seed extract work more efficiently, requiring much lower levels than when polyphenols are isolated or concentrated out of the proper ratio with their counterparts. *Vision™* supplies a variety of antioxidants and their counterparts in their naturally occurring ratios, including vitamins A, C and E.

### Nutritional Immunology Formulation

Many popular antioxidant supplements and enhanced foods tout the ORAC (Oxygen Radical Absorbance Capacity) value of their products, which measures the total antioxidant activity of a substance. Although ORAC provides an idea of the potential of a product, it tells nothing about the variety of antioxidants available or how the body uses them. Rather than focusing on a certain ORAC value, *Vision™* uses a water-soluble grape seed extract to provide just the right balance of vitamins, polyphenols and other naturally occurring antioxidant compounds. Studies show that a broad spectrum of antioxidants is safer and more effective for maintaining long term health than a single antioxidant with a much higher ORAC value.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

## E. Excel Nutritional Immunology® Whole Food Concentrates

E. Excel Nutritional Immunology®, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life's most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

### Herbal Whole Food Concentrates

E. Excel's whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of "accidental overdose" because their ingredients are whole foods.

### Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. Excel whole food concentrate supports functions of specific body systems by balancing the immune system's activity or "energy" in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. Excel Nutritional Immunology® whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
