

W•L®

Assists in Natural Metabolic Processes

Benefits

- Supports Endocrine System
- Cleanses and Soothes the Liver
- Increases Energy Without Stimulants
- Helps Correct Fluid Imbalances
- Contributes to Safe, Lasting Weight Loss

Maintaining a healthy body weight is one of the single most important things we can do to protect our health. Reducing body weight by just a few pounds can greatly decrease health risks. In addition, it contributes to improved mood, productivity and longer life. *W•L*® combines high energy food sources to assist in natural metabolic processes that burn fat and reduce overall body weight.

How *W•L*® Works

The endocrine system works with the liver and insulin receptors in cells to control metabolism. With exercise and good food choices, our endocrine system does an excellent job maintaining normal weight. However, once disrupted, it can be very challenging to regain and maintain the balance required. Herbs in *W•L*® help to restore energy levels by improving nutrient and oxygen delivery to cells. Bee pollen supports the adrenal glands, which secrete the belly fat-storing stress hormone cortisol. *W•L*® also blends cleansing and soothing herbs to help our endocrine system adjust to our bodies' changes. No matter what exercise activity you choose or what lifestyle improvements you make, *W•L*® supports better, longer-lasting results from your weight loss efforts.

Nutritional Immunology Formulation

It's a simple equation—weight gained = calories eaten – calories burned—but over-stimulating our metabolism, binge eating after starvation diets, and de-sensitizing our insulin receptors with high carbohydrate foods wreaks havoc with it. *W•L*® is a stimulant-free combination of herbs that work on multiple systems to correct metabolic imbalances, cleanse the body of toxins stored in fat and restore proper hydration.

E. Excel Nutritional Immunology® Whole Food Concentrates

E. Excel Nutritional Immunology®, a science pioneered by world-recognized immunologist and microbiologist, Dr. Jau-Fei Chen, PhD, advocates supporting the immune system with a healthy, whole-foods diet. After years of research in Oncology and Immunology, Dr. Chen found that the best defense against life's most common health risks is to build a healthy immune system through smart lifestyle choices where whole plant foods play a vital role.

Herbal Whole Food Concentrates

E. Excel's whole food concentrates are Nutritional Immunology formulations available in convenient capsules for swallowing. Or, open them and consume them in a tea or with a meal—making it that much easier to make sure you are eating a wide variety of healthy plant foods.

Our unique concentrates deliver optimal levels of the polysaccharides, antioxidants and phytochemicals found in whole plant foods—not isolated elements that support vitamin and mineral claims. We start with premium quality ingredients, grown and harvested in conditions that yield the highest levels of immune-supporting compounds. Then we prepare our ingredients with only water—no harsh chemicals. We use freeze-drying to help preserve the energy stored as plant enzymes in our ingredients.

Taken according to the directions on the label, they are safe for all ages, should not cause harmful side effects and pose no risk of "accidental overdose" because their ingredients are whole foods.

Immune System Support

Every major organ system in the body relies on the immune system to defend it around the clock from viruses, bacteria, parasites and allergens—as well as free radicals, DNA damage, insulin resistance and the aftermath of inflammatory responses. The better the immune system does these jobs, the healthier we are. Each E. Excel whole food concentrate supports functions of specific body systems by balancing the immune system's activity or "energy" in that system. Ultimately, if used properly along with other healthy lifestyle choices, each E. Excel Nutritional Immunology® whole food concentrate brings balance to the body, both mentally and physically, resulting in reduced health risks and a better quality of life.
